EXPOSIA

The exposure record for your workforce.

Exposia turns the Apple Watch your workers already wear into continuous occupational exposure records for UV, noise and heat, giving Australian HSE managers daily exceedance reporting and audit-ready due-diligence packs across all three hazards.

MODULES

UVDose: continuous UV exposure records from Time in Daylight and the ARPANSA UV index: crew aggregation, exceedance reporting, and PPE program evidence.

NoiseDose: indicative noise dose monitoring against the 85 dB(A) LAeq,8h standard, with WHS Reg 58 threshold tracking to support your testing program.

HeatDose: an indicative heat-strain awareness record relative to each worker's own baseline, for awareness and record-keeping.

PRICING

Single	Duo	Full Suite
$9	$14	$18
per worker / month	per worker / month	per worker / month

Per-worker-per-month, annual contracts, 25-worker minimum. Full Suite (UVDose + NoiseDose + HeatDose): $216 per worker, per year.

WHAT IT REPLACES

Calibrated dosimeter **$2,500 /unit**	Site noise survey **$3,000–5,000**
Audiometric test **~$70 /worker**	Average NIHL claim **$7,000**
Heat comp claims, 2009–2019 **1,774**	

START WITH A PILOT

90 days, up to 50 workers, one site, for a fixed $2,500, credited in full against your first annual contract, with full-suite access across all three modules included by default. It includes deployment support, one mid-pilot review, and a closing exposure report you keep regardless of what happens next.

90 days · ≤50 workers · $2,500 credited · full suite included

Exposia provides indicative exposure estimates for awareness, planning and documentation. It is not a measurement instrument, does not constitute a control measure under WHS/OHS legislation, and is not a substitute for formal assessment by qualified occupational hygiene professionals.
